

**1-833-NOFEVER**

## ThermalScreen™ Lite Mass Fever Detection System

- AI enhanced face-recognition technology
- Advanced thermal near-infrared sensors
- Easy-to-use software pre-loaded on a Windows 10 Tablet

Fast and accurate, the ThermalScreen™ Lite is your business's first line of defense against the spread of infectious diseases like COVID-19.

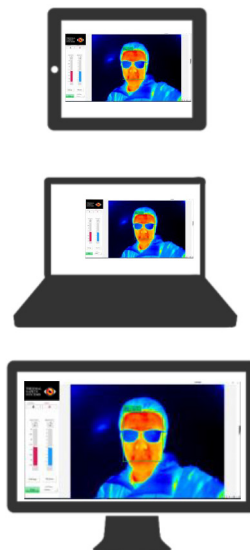

Designed as an all-in-one solution for the purpose of ensuring safe environments, it works equally well as a prevention mechanism, or for control during a pandemic. This system provides protection to yourself, your employees, and your customers from potentially deadly infections by conducting discreet, non-contact screening to identify individuals with elevated temperatures or fevers.

The ThermalScreen™ Lite samples multiple points on a person's face to provide extremely reliable temperature readings (within  $\pm 0.5^\circ\text{C}$ ) in under 1 second from a distance of up to 6 feet.

### INCLUDED COMPONENTS

### WORKS WITH

Includes service support and 1-year warranty. Working environment: Microsoft Windows 10 64 bits

Suitable for offices, retail shops, schools, restaurants, bars, senior centers, and other establishments where scanning can occur within a distance of 6 ft. from system.

<b>Temperature Measurement</b>	
Measuring Range	30~45°C
Measuring Accuracy	0.5°C
Measuring Distance	~2m / ~6 ft
<b>Infrared Camera</b>	
Resolution	256x192
FPS	25hx
Focal Length	3.2mm
Field of View	56° x 42°
F#	1.1
Size	80x80x14.2mm / 3.15x 3.15 x0.5 in
Weight	≤77g / 2.72 oz.
I/O	Mini USB
<b>Tablet</b>	
Battery Life	≥5h (No external power supply)
Tablet OS	Windows 10, 64 bit
<b>Tripod</b>	
Folded Size	540mm / 21 1/4"
Extended Size	560mm / 5' 1"
<b>Environmental Adaptation</b>	
Working Temperature	2~50°C / 35~122°F
Storage Temperature	-20°C~60°C / -4~140° F
