

ThermalScreen™ Safe

**All-in-One Fever Screening,
Mask Detection and Hand
Sanitizing Station**

The ThermalScreen™ Safe is an easy and economical way to implement the safe operating measures recommended by the Center for Disease Control (CDC). This sleek modern tower does it all: checks for fever, enforces face mask policy and dispenses hand sanitizer. The system also includes face recognition features which can be enabled for security and time & attendance management.

The hand sanitizer dispenser features touch-free operation which is clean and convenient for users. Automating temperature checks and face mask detection frees up staff for other duties.

- Non-contact fever screening in milliseconds
- Audible warning to enforce face mask policy
- Touch-free sensor dispenses hand sanitizer
- Wired network, Wi-Fi and optional 4G
- Face recognition can be enabled / database of 20,000 faces and time/attendance reporting.

Can be custom branded

Complimentary custom branding with minimum order of 500 units

Self-installed, includes 1-year warranty

MAIN SPECIFICATIONS	
Model: ThermalScreen™ Safe	
Camera Resolution	1280 x 720
Face Distance	30-50cm / 12~20 in
Temperature Measuring Range	35.5-42°C / 95.9-107.6°F
Temperature Measuring Accuracy	0.5°C
Hand Sanitizer liquid	foam, soap, or gel
Hand Sanitizer Dispenser	adjustable distance, infrared induction sensor
Screen	Capacitive touch screen, 8-inch A-gauge LCD (16:10)
CPU	Quad core RK3288 ARM-A17 1.8GH, GPU:Mail-T764
OS	Android 7.1.2
Storage	Memory: 2G Storage: 8G
Storage Capacity	20,000 faces database and 150,000 records
Face Recognition	Accuracy >99.97% recognition speed <100ms
Spray pump head	life-span of over 300,000 uses
Sanitizer Tank	1200ml refillable bottle
External size	240 w × 1610 h × 200 d mm 9.5 in w × 5.5 ft h × 9 in d
Power	DC 12V / AC 110-240V
Additional options	Custom branding
